Education

University of Western Ontario

Sept 2024 – Expected May 2026

Honors Bachelor of Science in Computer Science

London, Ontario

• CGPA: 3.5/4.0 (88%)

• Relevant Courses: Data Structures & Algorithms, Software Design & Arch., Web Development, Operating Systems

• Extra Curriculars: Western Developers Society (WDS), Gujarati Students Assc., Ultimate Frisbee

Toronto Metropolitan University

Sept 2021 - Aug 2024

Honors Bachelor of Science in Computer Science Co-op

Toronto, Ontario

• CGPA: 3.93/4.33 (91%) — Dean's List, Ryerson Scholar (\$8000)

Technical Skills

LanguagesTypeScript, JavaScript, HTML, CSS, Java, Python, SQL, C, ShellFrameworks & ToolsReact, Vue, Node, Express, MySQL, MS Power Platform, TableauConceptsAPIs (REST), Agile Methodologies (Scrum, Kanban), DBMS, CI/CD

Experience

Software Developer Co-op

Sept 2023 - Sept 2024

Ontario Power Generation Inc.

Pickering, Ontario

- Up-cycled an internal safety event tracking app with React, automating the live tracking of 1,000+ monthly reports and significantly reducing event resolution turnaround time.
- Addressed regular production bugs and improvements in 50+ existing SQL database views and procedures.
- Collaborated with station stakeholders, using data from internal feedback apps to develop dashboards and station health reports identifying improvement opportunities across 50+ station divisions to bolster nuclear worker safety standards.
- Built an interactive website with AI-driven visualizations using Python (Streamlit, Plotly) to display trending data, delivering key insights for reports used in the Canadian Nuclear Safety Commission (CNSC) audit/visit at PNGS.

Peer Mentor - Tri-Mentoring Program

Oct 2022 - Apr 2023

Toronto Metropolitan University

Toronto, Ontario

• Worked in a network of support staff to facilitate the academic transition & personal growth of 30+ first-years.

Projects

DSA Snippets - VSCode Extension | JavaScript, JSON, Java

- Created a JavaScript snippets extension with 1100+ installs featuring 65+ Data Structure & Algorithm code snippets.
- Interpreted the VS Code API to code the JSON snippets file, document Changelog, and publish to VS Marketplace.
- Reduced snippet formatting stage from 8 minutes to 30 seconds through a Java automation program.

drake.rest - Drake Quotes Web App | TypeScript, Next.js, Tailwind

- Developed a publicly exposed REST-API to serve random Drake quotes & song lyrics from a JSON corpus.
- Designed a modern, user-friendly interface that allows users to shuffle random Drake quotes and share them on Twitter.

NPM Dependency Di-Graph Visualizer | Vue.js, TypeScript, Jest, Github Actions

- Built an interactive web app to visualize NPM package dependencies and highlight deprecated packages, helping users understand relationships and manage versions.
- Optimized performance by debouncing API calls using Lodash and applying memoization for recursive graph building.
- Set up automated CI/CD pipeline using GitHub Actions, enabling seamless Jest unit-testing and deployment on Vercel.

Toronto Starbucks Effect Analysis | Python, MySQL, Pandas, Tableau, Excel, Jupyter

- Utilized Python for ETL processing of datasets from Starbucks and City of Toronto Open Data, before loading it into a MySQL database for efficient storage and retrieval.
- Leveraged Tableau to create interactive graphs and visualizations, providing key insights on the correlation between Starbucks locations and Toronto neighborhood profiles.
